## Engineered tough, built beautiful – that's Mountain Buggy™

The original, all terrain Mountain Buggy™, is a regular addition to “must-have” lists the world over. With the enhanced 2010 range of our all terrain buggies: the swift™, urban jungle™ and duo™ set to appear on shop floors this month, that must have ranking is set to be retained.

Engineered for the mountains, designed for the city; the all terrain Mountain Buggy will adapt to the environment – so you can live a life without limit.

Our philosophy of simplicity, durability, manoeuvrability, stability, adaptability and safety, is apparent in all mountain buggy designs. The 2010 range retains the popular 2-step easy fold system, quick release wheels, and adjustable sleep positions from upright to fully reclined, has a smarter 5-point safety harness, and global safety certification to meet the Australasian, USA, Canadian, and European standards.

Some of the new enhancements include:

- narrower wheel base – our buggies have no problems fitting through doorways
- bigger and smarter sunhoods with flick-out visors – allowing for improved UV protection
- compatible click-and-sleep-on-the-go swift, urban jungle and duo carrycots – for newborn adaptability
- a detachable bumper bar – for hands-on passenger control.

We've also made sure that your needs are catered for. Thirst quenching sports drink or decaf latte, the bottle holder takes either. Convenience is the key with accessories such as reversible liners, a travel bag, and covers to cater for sun or rain.

A mountain buggy is a valued and reliable asset – from the birth of child number one to the final buggy days of all siblings that follow!

Mountain Buggy – test driven and recommended by active parents wanting to live their own life. A life without limit.
